

What is causing the flaking and redness on my scalp?

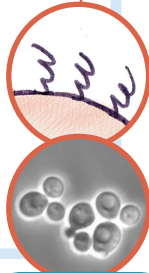

Yeasts live on the scalp and skin of everyone

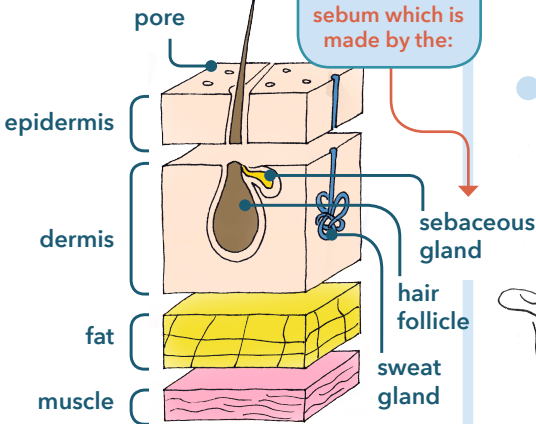

*Dr. Eddie's Happy Cappy relieves flaking, scaling, redness and itching caused by seborrheic dermatitis and dandruff*

Sebum lubricates skin

Yeasts eat sebum which is made by the:

When yeasts eat sebum, it makes an acid byproduct that irritates the scalp which causes flaking and redness

Flaking and redness of the scalp and skin is called seborrheic dermatitis and dandruff
